BnPC: A Gold Standard Corpus for Paraphrase Detection in Bangla, and its Evaluation

ELRA and ICCL · May 23, 2024

This publication presents a benchmark dataset for paraphrase detection in Bangla, addressing the gap in research for this widely spoken language. The dataset comprises 8,787 human-annotated sentence pairs from 23 newspaper headlines across four categories. Various supervised models, including fine-tuned BERT and GPT-3.5 turbo, were used to benchmark the dataset. Fine-tuned BanglaBERT achieved the highest weighted-F1 score of 87.91. GPT-3.5 demonstrated strong performance in zero-shot and...

This is what we've done in HackTheVerse, a hackathon organized by DU IITSEC. We had 36 hours to build a system to analyze continuous data stream from medical sensors and use the data to continue treatment maintaining a distance between patients and health workers. And we built a system that analyzes and shows live sensor data to the health workers and notifies all of them in an emergency.

We used NodeJS, ExpressJS as the back-end, Angular on the web front-end, Flutter on the mobile...

"Shakirul is a fast learner. He is capable of learning and becoming comfortable with any tools/technologies in a very short time. As I have seen his works, he always try to keep his code/projects very simple but makes sure that looks or works elegantly! He loves to tweak technologies and apply them wherever he can. He is very skilled at coding fast, maintaing simplicity and applying shortcuts while doing so. He is a tech geek and loves to get updated with on going technologies. He is also a very good and quick problem solver. He is the guy you need if you are looking for a complete package."
